

# oilfino Antifreeze Long Life

## DESCRIPTION

**oilfino Antifreeze Long Life** is an ethylene glycol based radiator corrosion inhibitor and antifreeze that provides maintenance-free protection against corrosion and frost when mixed with water, even with extended change intervals. It contains additives based on patented silicate-free, aliphatic acid which results in reliable lasting protection for conventional and aluminium engines.

## PROPERTIES

oilfino Antifreeze Long Life offers excellent year-round protection against corrosion and is recommended for cast iron or aluminium engines (or a combination of the two) along with aluminium and copper alloyed radiator systems. oilfino Antifreeze Long Life's low evaporation properties combined with impressive protection from corrosion, rust and cavitation as well as a long service life with reliable antifreeze protection make it the ideal year-round product for radiator systems. It does not contain nitrite, amine, silicate or phosphate, resulting in better environmental compatibility, and it can be mixed with other ethylene glycol-based corrosion inhibiting and antifreeze products. Top performance can only be guaranteed with the exclusive use of Oilfino Antifreeze Long Life.

## PROTECTION AGAINST CORROSION AND FROST

oilfino Antifreeze Long Life provides year-round protection against corrosion and frost. oilfino Antifreeze Long Life provides optimal protection in a 50:50 mixing ratio in volume % with solely demineralised or distilled water. oilfino Antifreeze Long Life concentrate needs to be diluted with water prior to use and may only be used in concentrations of min. 33 vol. % to max. 60 vol. %.

## SPECIFICATIONS

- AS 2108-2004
- BS 6580:2010
- ÖNORM V 5123
- CHINA GB 29743-2013
- ASTM D3306
- CUNA NC 956-16
- SAE J1034
- AFNOR NF R 15-601 NOV 2020
- JIS K 2234:2006
- SANS 1251:2005

## RECOMMENDATIONS

- VW GROUP (AUDI)

## NOTE

Antifreeze Long Life does not contain silicate, borate, 2-ethylhexanoic acid, nitrite, amine or phosphate.

Specific data	Method	Unit	Specific data
Colour			Yellowish brown
Density at 20°C	D 4052	g/ml	1.1237
pH value (50 vol. %)	D 1287		8.47
Crystallisation point (50 vol. %)	D 1177	°C	-38.3
Nitrites, amines, phosphates			None
